Responsible Care® Partnership Program

Guiding Principles

Through the Responsible Care initiative, our industry has made a commitment to improve environmental, health, safety and security performance. Accordingly, we believe and subscribe to the following principles:

- To lead Heniff in ethical ways that increasingly benefits society, the economy, and the environment.
- To work with customers, other carriers, suppliers, distributors and contractors to foster the safe and secure use, transport and disposal of chemicals and provide hazard and risk information that can be accessed and applied in their operations and products.
- To design and operate our facilities in a safe, secure, and environmentally-sound manner.
- To instill a culture throughout all levels of our organization to continually identify, reduce, and manage process safety risks.
- To promote pollution prevention, minimization of waste and conservation of energy, and other critical resources.
- To cooperate with governments at all levels and organizations in the development of effective and efficient safety, health, environmental and security laws, regulations and standards.
- To communicate product, service, and process risks to our stakeholders and listen to and consider their perspectives.
- To make continual progress towards our goal of no accidents, injuries or harm to human health and the environment from our customers' products and our operations and openly report our health, safety, environmental and security performance.
- To seek continual improvement in our integrated Responsible Care Management System® to address environmental, health, safety and security performance.
